RE: Letter of Assurance for Fertilizer

To Whom It May Concern:

This document is presented as a Letter of Assurance that Royal Brinkman Canada Inc. fertilizer products are manufactured within tolerances and in accordance with labeling guidelines and conforms to all regulations of the Canadian Fertilizer Act (R.S.C., 1985, c. F-10).

Levels on non-nutrient heavy metals meet the Canadian Food Inspection Agency T-4-93 – Standards for metals in fertilizers and supplements – Table I Maximum Acceptable Cumulative Metal Additions of Soil.

Fertilizers manufactured by or for Royal Brinkman Canada Inc. do not contain any known hazardous substances and comply with Canadian Food Inspection Agency T-4-93 – Standards of metal in fertilizers and supplements. Granular filler (palletized limestone) does not contain any hazardous substances or compounds. The balance in inert ingredients contains no known hazardous substances.

Royal Brinkman Canada Inc. fertilizers are approved for use on agricultural crops and / or turf and ornamental applications when used at recommended rates.

If you have an additional questions or concerns, please contact me by telephone 519-821-1684 ext 1222.

Sincerely,

Julie Fordyce
Operations and Marketing Manager
